

# LIMIT SWITCHES FOOT SWITCHES

# Quality certifications

*As ever watchful for quality, since 1998, Comepi is qualified ISO 9002 thus offering its domestic and foreign interlocutors a deeper warranty of its ability to adequately answer the ever increasing need of effective and fruitful relationship.*

*The update to ISO 9001:2008, made in 2009, confirms the Comepi quality politics. The control of full application of ISO 9000 norms and its timely updating is guaranteed by well tested procedures ranging from control of the process up to the use of statistic techniques.*

*Comepi personnel, at any given level, is involved in this process in order to achieve the highest end-user satisfaction besides growth of image, competitiveness and profits for the firm.*

## SUMMARY LIMIT SWITCHES

### Contact blocks

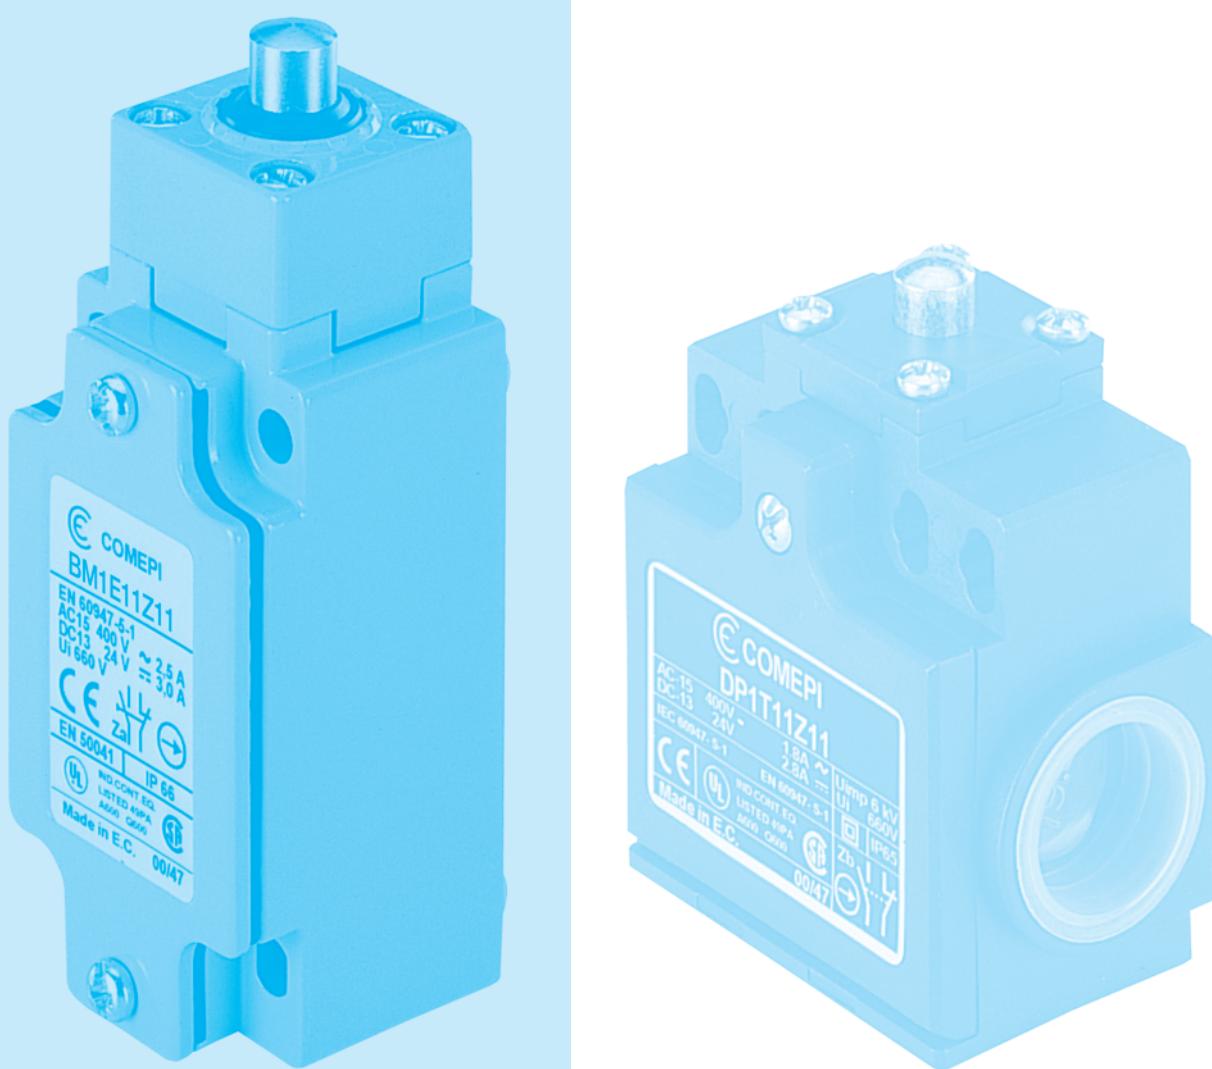

**Zb type:** double break, electrically separated

**Approvals:** UL 508 / CSA C22-2 n. 14

# LIMIT SWITCHES

The **Comepi** products listed in this catalogue are developed and manufactured according to the rules set out in IEC international publications and EN European standard.

### Specifications

- **International Specifications**

The International Electrotechnical Commission, IEC, which is part of the International Standards Organization, ISO, publishes IEC publications which act as a basis for the world market.

- **European Specifications**

The European Committee for Electrotechnical Standardisation (CENELEC) publishes EN standards for low voltage industrial apparatus.

These European standards differ very little from IEC international standards and use a similar numbering system. The same is true of national standards. Contradicting national standards are withdrawn.

- **Harmonised European Specifications**

The European Committees for Standardisation (CEN and CENELEC) publish EN standards relating to safety of machinery.

- **Specifications in Canada and the USA**

These are equivalent, but differ markedly from IEC, UTE, VDE and BS specifications.

**UL** Underwriters Laboratories (USA)

**CSA** Canadian Standards Association (Canada)

Remark concerning the label issued by the UL (USA). Two levels of acceptance between devices must be distinguished.

**"Recognized"** Authorised to be included in equipment, if the equipment in question has been entirely mounted and wired by qualified personnel. They are not valid for use as "General purpose products" as their possibilities are limited.

They bear the mark: 

**"Listed"** Authorised to be included in equipment and for separate sale are "General purpose products" components in the USA.

They bear the mark: 

### European Directives

The guarantee of free movement of goods within the European Community assumes elimination of any regulatory differences between the member states. European Directives set up common rules that are included in the legislation of each state while contradictory regulations are cancelled.

There are three main directives:

- **Low Voltage Directive 2014/35/UE** concerning electrical equipment from 50 to 1000 V a.c. and from 75 to 1500 V d.c.

This specifies that compliance with the requirements that is sets out **is acquired** once the equipment conforms to the standards harmonised at European level: EN 60947-1 and EN-60947-5-1 for **limit switches**.

- **Machines Directives - 2006/42/CE** defining main safety and health requirements concerning design and manufacture of the machines and other equipment including safety components in European Union countries.

- **Electromagnetic Compatibility Directive 2014/30/UE** concerning all electrical devices likely to create electromagnetic disturbances.

### Signification of CE marking:

**CE marking** must not be confused with a quality label.

**CE marking** placed on a product is proof of conformity with the European Devices concerning the product.

**CE marking** is part of an administrative procedure and guarantees free movement of the product within the European Community.

### Standards

- **International Standards**

**IEC 60947-1** Low-voltage switchgear and controlgear - Part 1: General Rules (CEI EN 60947-1).

**IEC 60947-5-1** Low-voltage switchgear and controlgear - Part 5: Control circuit devices and switching elements - Section 1: Electromechanical control circuit devices (CEI EN 60947-5-1) - Chapter 3: Special requirements for control switches with positive opening operation.

**IEC 60204-1** Electrical equipment on industrial machines - Part 1: General requirements (CEI EN 60204-1).

**IEC 60204-2** Electrical equipment on industrial machines - Part 2: Item designation and examples of drawings, diagrams, tables and instructions.

**IEC 60529** Degrees of protection provided by enclosure (IP code) (CEI EN 60529).

- **European Standards**

- EN 50041** Low-voltage switchgear and controlgear for industrial use - Control switches - Position switches 42,5 x 80 - Dimensions and characteristics.
- EN 50047** Low-voltage switchgear and controlgear for industrial use - Control switches - Position switches 30 x 55 - Dimensions and characteristics.
- EN 60947-1** Low-voltage switchgear and controlgear for industrial use - Part 1: General rules.
- EN 60947-5-1** Low-voltage switchgear and controlgear for industrial use - Part 5: Control circuit devices and switching elements - Section 1: Electromechanical control circuit devices - Chapter 3: Special requirements for control switches with positive opening operation.
- EN 60529** Degrees of protection provided by enclosures (IP code).
- EN 61058-1** Switches for appliances. Part. 1: general requirements.
- EN 60947-5-5** Low-voltage switchgear and controlgear - Part 5-5: Control circuit devices and switching elements - Electrical emergency stop device with mechanical latching function.

- **American Standards**

- UL 508** Standard for Industrial Control Equipment.
- CSA - C22.2 No. 14-13** Industrial Control Equipment.

#### Double Insulation

Class II materials, according to IEC 536, are designed with double insulation. This measure consists in doubling the functional insulation with an additional layer of insulation so as to eliminate the risk of electric shock and thus not having to protect elsewhere. No conductive part of "double insulated" material should be connected to a protective conductor.

#### Positive Opening Operation

A control switch, with one or more break-contact elements, has a positive opening operation when the switch actuator ensures full contact opening of the break-contact. For the part of travel that separates the contacts, there must be a positive drive, with no resilient member (e.g. springs), between the moving contacts and the point of the actuator to which the actuating force is applied.

The positive opening operation does not deal with N.O. contacts.

Control switches with positive opening operation may be provided with either snap action or slow action contact elements. To use several contacts on the same control switch with positive opening operation, they must be electrically separated from each other, if not, only one may be used.

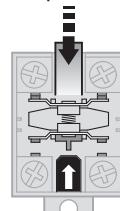

Every control switch with positive opening operation must be indelibly marked on the outside with the symbol: .

#### Snap Action

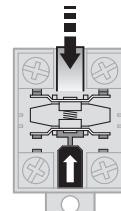

Snap action contacts are characterised by a release position that is distinct from the operating position (differential travel). Snap breaking of moving contacts is independent of the switch actuator's speed and contributes to regular electric performance even for slow switch actuator speeds.

State of rest

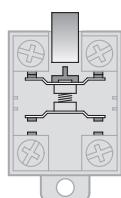

Contact change

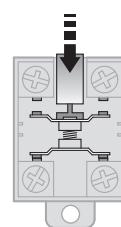

Positive opening

#### Slow Action

Slow action contacts are characterised by a release position that is the same as the operating position. The switch actuator's speed directly conditions the travel speed of contacts.

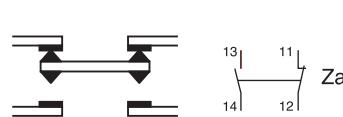

State of rest

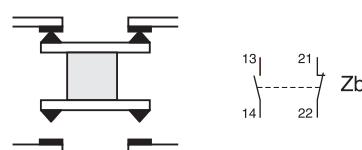

Completely closed

#### Contact shape according to IEC 947-5-1.

Change-over contact elements with 4 terminals must be indelibly marked with the corresponding Za or Zb symbol as in the diagrams below.

Contacts with the same polarity

The 2 moving contacts are electrically separated

#### Utilization Category

AC-15: switching of electromagnetic loads of electromagnets using an alternating current (>72 VA).

DC-13: switching of electromagnets using a direct current.

#### Terminals

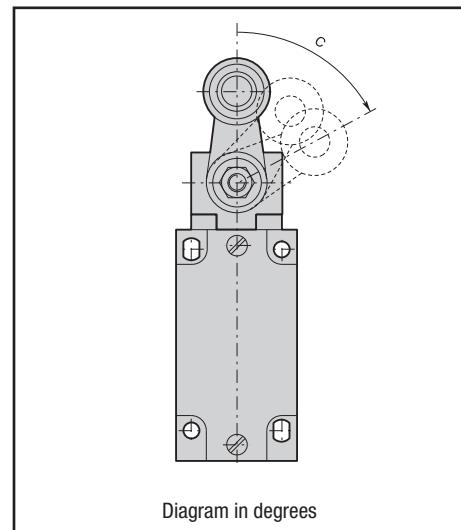

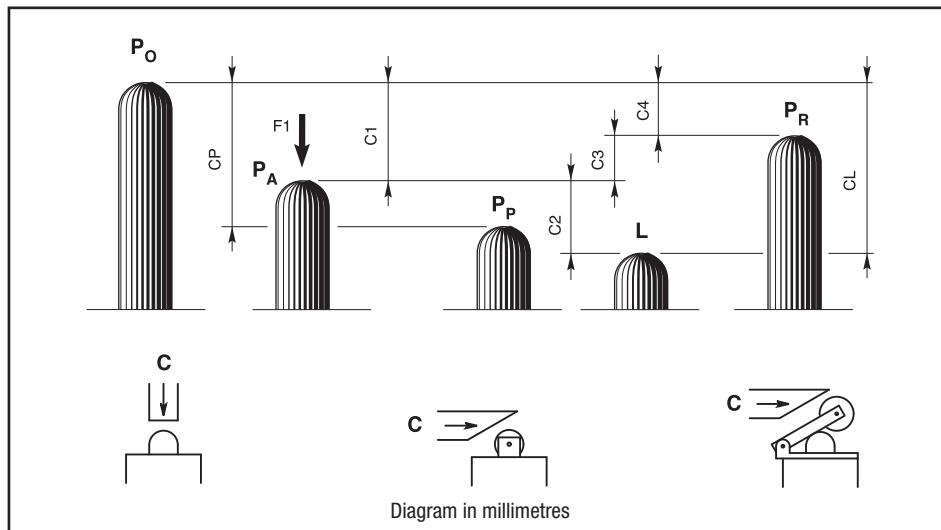

Limit switches with metal casings must have a terminal, for a protective conductor, that is placed inside the casing very close to the cable inlet and must be indelibly marked.

#### Minimum Actuation Force/Torque

The minimum amount of force/torque that is to be applied to the switch actuator to produce a change in contact position.

#### Minimum Force/Torque to achieve Positive Opening Operation

The minimum amount of force/torque that is to be applied to the switch actuator to ensure positive opening operation of the N.C. contact.

### P<sub>0</sub> Free position:

position of the switch actuator when no external force is exerted on it.

### P<sub>A</sub> Operating position:

position of the switch actuator, under the effect of force F<sub>1</sub>, when the contacts leave their initial free position.

### P<sub>P</sub> Positive opening position:

position of the switch actuator from which positive opening is ensured.

### L Max. travel position:

maximum acceptable travel position of the switch actuator under the effect of a force F<sub>1</sub>.

### P<sub>R</sub> Release position:

position of the switch actuator when the contacts return to their initial free position.

### C<sub>1</sub> Pre-travel:

distance between the free position P<sub>0</sub> and the operating position P<sub>A</sub>.

### C<sub>P</sub> Positive opening travel:

minimum travel of the switch actuator, from the free position, to ensure positive opening operation of the normally closed contact.

### C<sub>2</sub> Over-travel:

distance between the operating position P<sub>A</sub> and the max. travel position L.

### C<sub>L</sub> Max. travel:

distance between the free position P<sub>0</sub> and the max. travel position L.

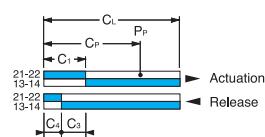

### C<sub>3</sub> Differential travel (C<sub>1</sub>-C<sub>4</sub>):

travel difference of the switch actuator between the operating position P<sub>A</sub> and the release position P<sub>R</sub>.

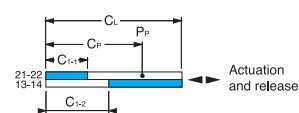

### C<sub>4</sub> Release travel:

distance between the release position P<sub>R</sub> and the free position P<sub>0</sub>.

### Diagram for snap action contacts:

### Diagram for non-overlapping slow action contacts:

Note: for slow action contacts, C<sub>3</sub> = 0, C<sub>1-1</sub> = pre-travel of contact 21-22, C<sub>1-2</sub> = pre-travel of contact 13-14

### Examples:

#### BM1E13Z11

(snap action contacts)

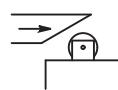

Diagram in millimetres/cam travel

#### BM1E41Z11

(snap action contacts)

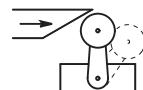

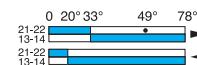

Diagram in degrees/lever rotation

#### BM1E11X11

(non-overlapping slow action contacts)

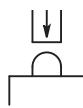

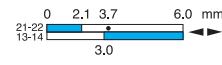

Diagram in millimetres/plunger travel

## Applications

### Easy to use, electromechanical limit switches offer specific qualities:

- Visible operation.
- Able to switch strong currents (10 A conventional thermal current).
- Electrically separated contacts.
- Precise operating points (consistency).
- Immune to electromagnetic disturbances.

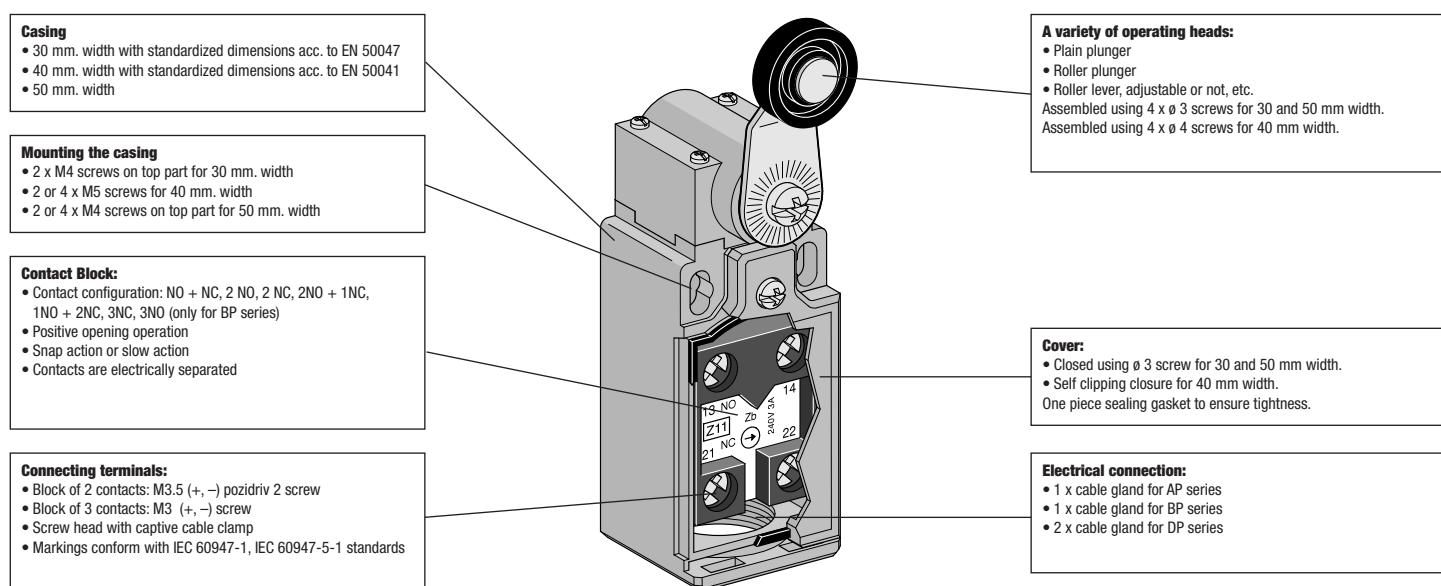

### They are purpose-built detection devices thanks to these characteristics:

- Presence/absence.
- Positioning and travel limit.
- Objects passing/counting.

## Description

Limit switches, which are made of reinforced UL-VO thermoplastic fiber-glass, offer double insulation and a degree of protection of IP65.

The casing come in 3 dimension: – AP... 30 mm. width – BP... 40 mm. width – DP... 50 mm. width

## Symbols

**Example:** A | P | 1 | T | 41 | Z | 1 | 1

**Structure:**

	A	P	1	T	41	Z	1	1

**Casing width:**  
**A** = 30 mm width + 1 cable inlet  
**B** = 40 mm width + 1 cable inlet  
**D** = 50 mm width + 2 cable inlets

**Plastic casing**

**Electrical connection**  
**1:** cable inlets for PG13.5 cable gland  
**2:** cable inlets for 1/2 NPT cable gland \*  
**3:** cable inlets for PG11 cable gland (only for AP and DP series)  
**4:** cable inlets for M16 x 1.5 cable gland (only for AP and DP series)  
**5:** cable inlets for M20 x 1.5 cable gland

**Plastic heads**  
**T:** for AP and DP series  
**H:** for BP series only

**Operating heads:** codes 10 - 9999

**Contact block**

**11:** 1 NO + 1 NC contacts  
**20:** 2 NO contacts  
**02:** 2 NC contacts  
**12P:** 1 NO + 2 NC contacts  
**21P:** 2 NO + 1 NC contacts  
**03P:** 3 NC contacts

**Only for BP series:**

**12:** 1 NO + 2NC contacts  
**21:** 2 NO + 1 NC contacts  
**03:** 3 NC contacts  
**30:** 3 NO contacts  
**Z:** Snap action  
**W:** Slow action (contact dependent)  
**X:** Slow action non-overlapping late make  
**Y:** Slow action overlapping early make

\* In AP... and DP... series, the 1/2" NPT thread is obtained by the use of a plastic adapter (delivered not mounted).

#### General Technical Data

Standards	Plastic Casing	
	Devices conform with international IEC 60947-5-1 and European EN 60947-5-1 standards	
Certifications - Approvals	UL - CSA - IMQ - EAC	
Air temperature near the device	- during operation °C - for storage °C	
Climatic withstand	According to IEC 60068-2-3 and salty mist according to IEC 60068-2-11	
Mounting positions	All positions are authorised	
Shock withstand (according to IEC 60068-2-27 and EN 60068-2-27)	50g* (1/2 sinusoidal shock for 11 ms) no change in contact position	
Resistance to vibrations (acc. to IEC 60068-2-6 and EN 60068-2-6)	25g (10 ... 500 Hz) no change in position of contacts greater than 100 µs	
Protection against electrical shocks (acc. to IEC 60536)	Class II	
Degree of protection (according to IEC 60529 and EN 60529)	IP 65	
Consistency (measured over 1 million operations)	0.1 mm (upon closing point)	
Minimum actuation speed	m/s	Slow action contacts 0.060 / Snap action contacts 0.001

#### Electrical Data

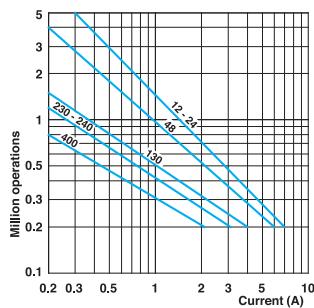

Rated insulation voltage $U_i$	500 V (degree of pollution 3) (400 V for contacts type Z02, X12P, X21P, W03P) A 600, Q 600 (A 300, Q 300 for contacts type X12P, X21P, W03P)		
Rated impulse withstand voltage $U_{imp}$ (according to IEC 60947-1 and EN 60947-1)	6 (4kV for contacts type X12P, X21P, W03P)		
Conventional free air thermal current $I_{th}$ (according to IEC 60947-5-1) $\theta < 40^\circ \text{C}$	10		
Short-circuit protection $U_e < 500 \text{ V a.c. - gG (gl) type fuses}$	10		
Rated operational current $I_e / AC-15$ (according to IEC 60947-5-1)	24 V - 50/60 Hz	A	10
	120 V - 50/60 Hz	A	6
	400 V - 50/60 Hz	A	4
$I_e / DC-13$ (according to IEC 60947-5-1)	24 V - d.c.	A	6
	125 V - d.c.	A	0.55
	250 V - d.c.	A	0.4
Switching frequency	3600 Cycles/h		
Load factor	0.5		
Resistance between contacts	mΩ		
Connecting terminals	M3.5 (+, -) pozidriv 2 screw with cable clamp (M3 for 3 poles contacts type)		
Terminal for protective conductor	-		
Connecting capacity	1 or 2 x mm <sup>2</sup>		
Terminal marking	According to IEC 60947-5-1		
Mechanical durability	Millions of operations	15 AP•T {10...12; 30...34; 38 10 DP•T {13; 41...48; 51...55; 61...75 >5 {14; 35; 36; 39; 91...93; 98	30 BP•H {11...13; 31...33 25 {41...44; 51...54; 61...75 10 {14; 19; 35...37; 91...93

#### AC-15 - Snap action

#### AC-15 - Slow action

DC-13	Snap action	Slow action
	Power breaking for a durability of 5 million operating cycles	
Voltage	24 V	9.5 W
Voltage	48 V	6.8 W
Voltage	110 V	3.6 W

## Applications

### Easy to use, electromechanical limit switches offer specific qualities:

- Visible operation.
- Able to switch strong currents (10 A conventional thermal current).
- Electrically separated contacts.
- Precise operating points (consistency).
- Immune to electromagnetic disturbances.

### They are purpose-built detection devices thanks to these characteristics:

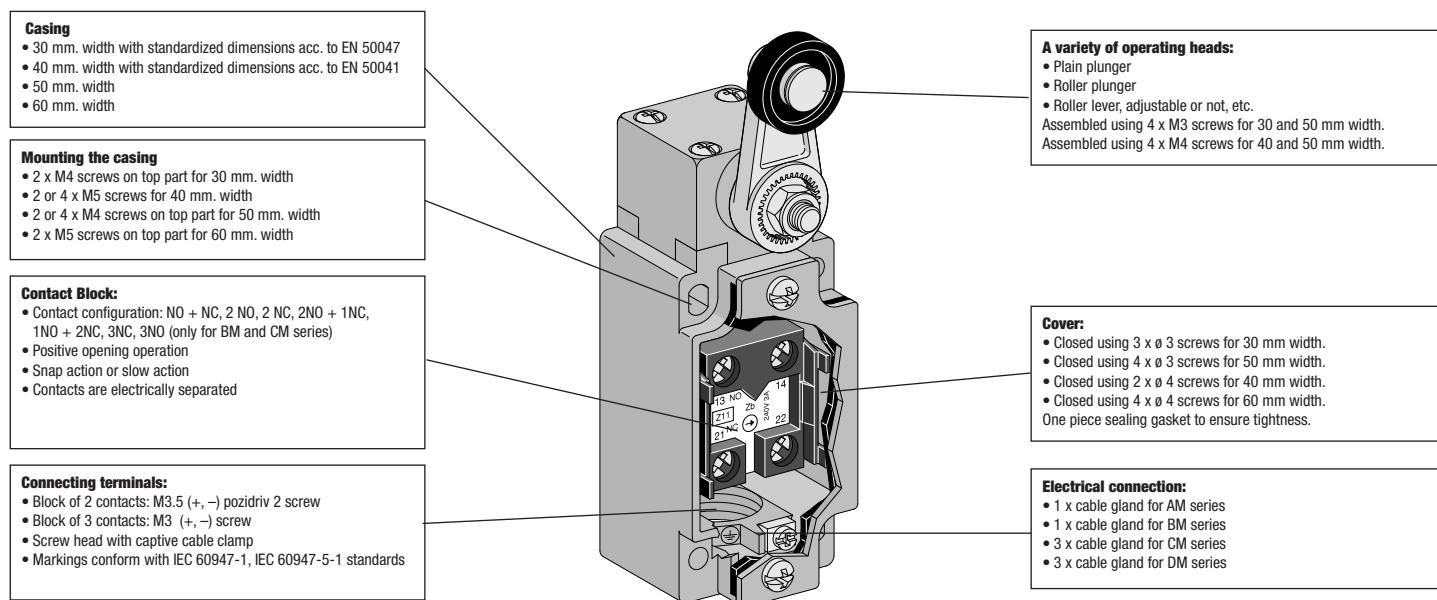

- Presence/absence.
- Positioning and travel limit.
- Objects passing/counting.

## Description

The AM... and DM... series are made of zinc alloy (Zamak). The limit switches BM... and CM... series are realized in aluminium material, therefore they are mechanically more resistant and three times lighter than the ones in zinc alloy. All metal limit switches have a degree protection of IP 66.

The casing come in 4 dimension:

- AM... 30 mm. width
- BM... 40 mm. width
- DM... 50 mm. width
- CM... 60 mm. width

## Symbols

Example: B M 1 E 41 Z 1 1

Structure:

**Casing width:**  
**A** = 30 mm width + 1 cable inlet  
**B** = 40 mm width + 1 cable inlet  
**D** = 50 mm width + 3 cable inlets  
**C** = 60 mm width + 3 cable inlets

**Metal casing**

**Electrical connection**  
**1**: cable inlets for PG13.5 cable gland  
**2**: cable inlets for 1/2 NPT cable gland  
**3**: cable inlets for PG11 cable gland (only for AM and DM series)  
**4**: cable inlets for M16 x 1.5 cable gland (only for AM and DM series)  
**5**: cable inlets for M20 x 1.5 cable gland

**Operating heads**  
**T**: plastic heads      **F**: metal heads ... (AM and DM series)  
**P**: plastic heads      **E**: metal heads ... (BM and CM series)

**Operating heads:** codes 10 - 99

**Contact block**

- 11:** 1 NO + 1 NC contacts
- 20:** 2 NO contacts
- 02:** 2 NC contacts
- 12P:** 1 NO + 2 NC contacts
- 21P:** 2 NO + 1 NC contacts
- 03P:** 3 NC contacts

#### Only for BM and CM series:

- 12:** 1 NO + 2NC contacts
- 21:** 2 NO + 1 NC contacts
- 03:** 3 NC contacts
- 30:** 3 NO contacts
- Z:** Snap action
- W:** Slow action (contact dependent)
- X:** Slow action non-overlapping late make
- Y:** Slow action overlapping early make

## Electrical connection:

**Standard:** 1 m. UL PVC cable 4 x 0,75 mm<sup>2</sup> (EP... series)  
1 m. UL PVC cable 5 x 0,75 mm<sup>2</sup> (EM... series)

**On request:** All EP.../EM... limit switches can be supplied with different cable types and lengths  
according to the following ordering details

### EP/EM series with connectors

All the models can be supplied with M12 connector by adding "M" suffix to the ordering code, and with AMP connector by adding suffix "A".

### EXAMPLE

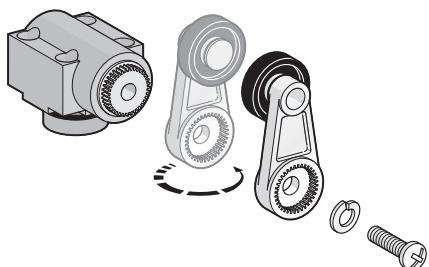

## Examples

**EM1G11ZU:** 30 mm. limit switch - plain plunger - snap action contact block - 1 m. UL standard cable.

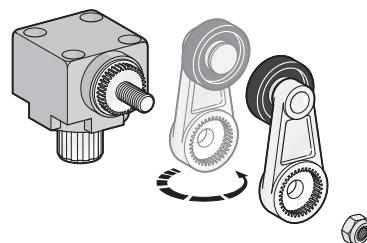

**EM1G11Z040U:** 30 mm. width limit switch - plain plunger - snap action contact block - 4 m. UL standard cable.

**EM1G11ZM:** 30 mm. width limit switch - plain plunger - snap action contact block - M12 connector

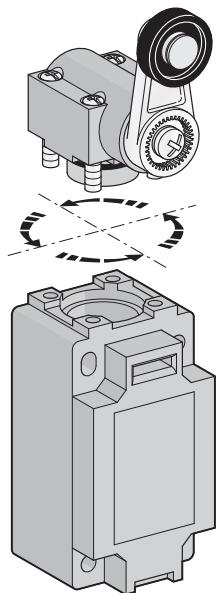

**EM1G11ZA:** 30 mm. width limit switch - plain plunger - snap action contact block - AMP connector

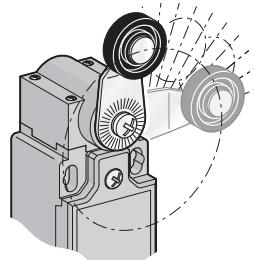

Lever round turning: AP...; BP...; DP...; AM...; DM...; EP...; EM...

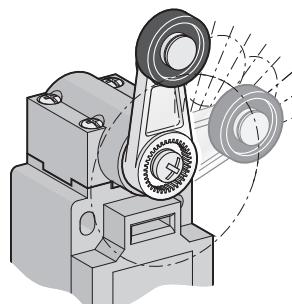

Lever round turning: BM...; CM...

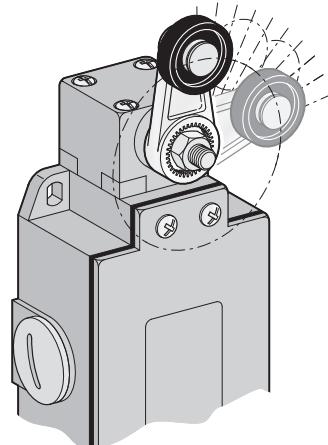

**Head orientation:** all series  
(EP and EM series: 180° only)

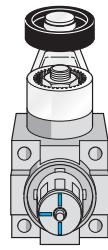

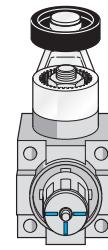

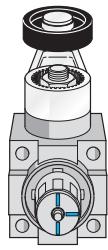

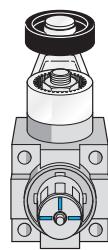

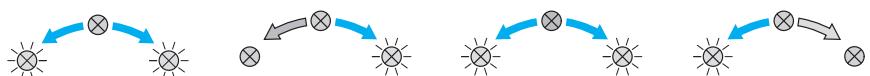

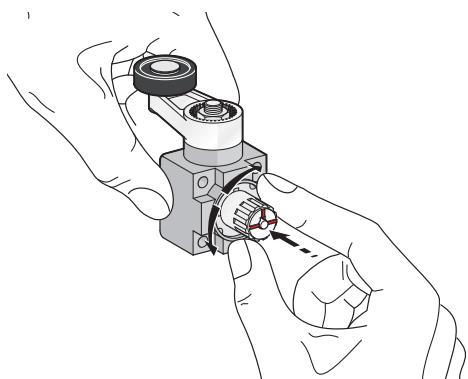

**Free position adjustment 10 in 10° of lever:**  
AP...; DP...; AM...; DM...; EP...; EM...

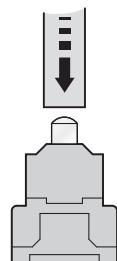

**Free position adjustment 9 in 9° of lever:**  
BP...

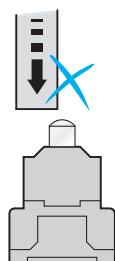

**Free position adjustment 9 in 9° of lever:**  
BM...; CM...

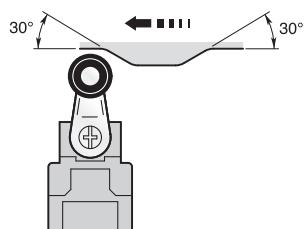

**BP...; BM...; CM... operating mode selection only**

**Plain Plunger**

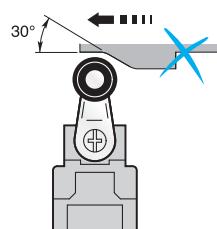

Correct

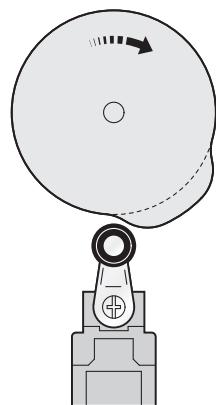

Incorrect

**Roller Plunger or Roller Lever**

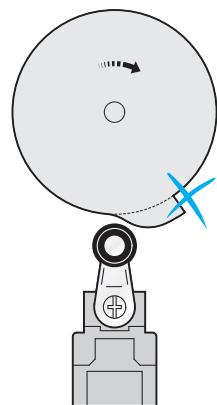

Correct

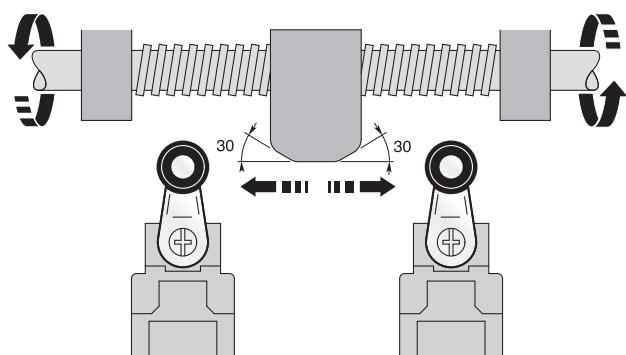

Incorrect

Correct

Incorrect

For a relatively slow movement of the switch actuator, a limit switch with a snap action contact block is preferred.

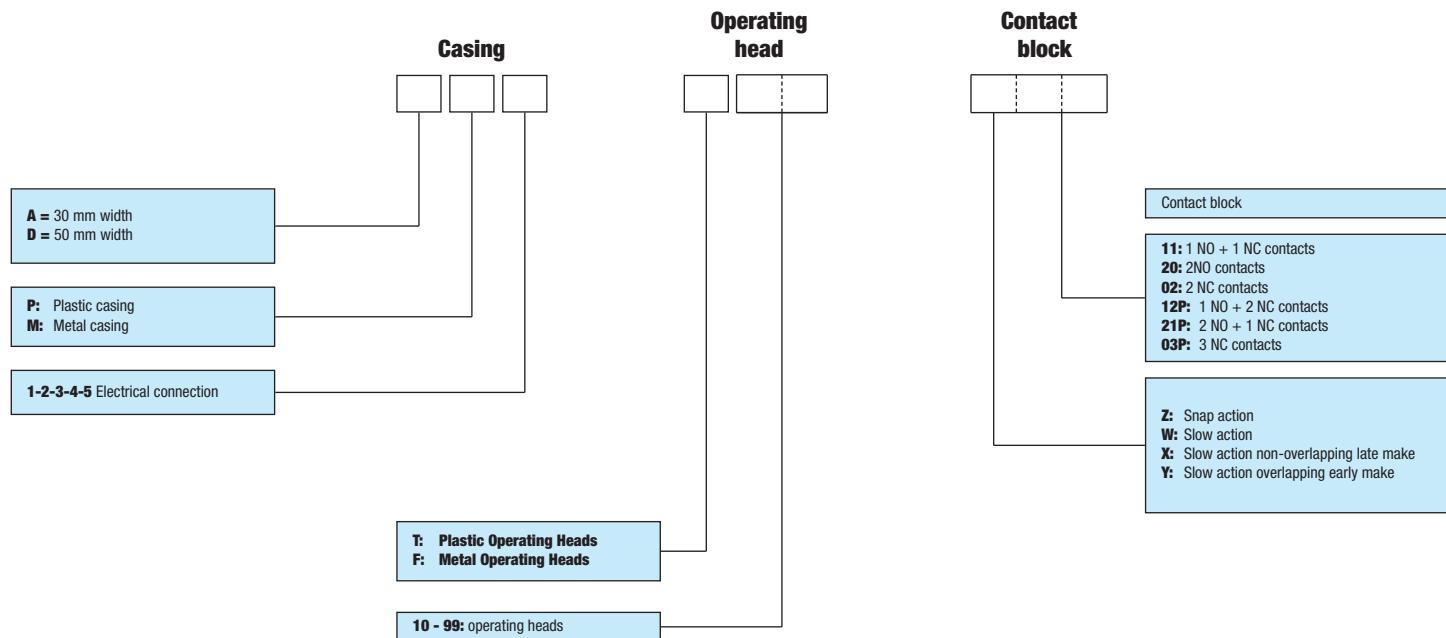

### AP... / AM... / DP... / DM... special versions

The operating heads used in plastic limit switches AP and DP series have the same dimensions of the ones used in the corresponding metal AM and DM series. It is therefore possible to supply "mixed" versions, that is:

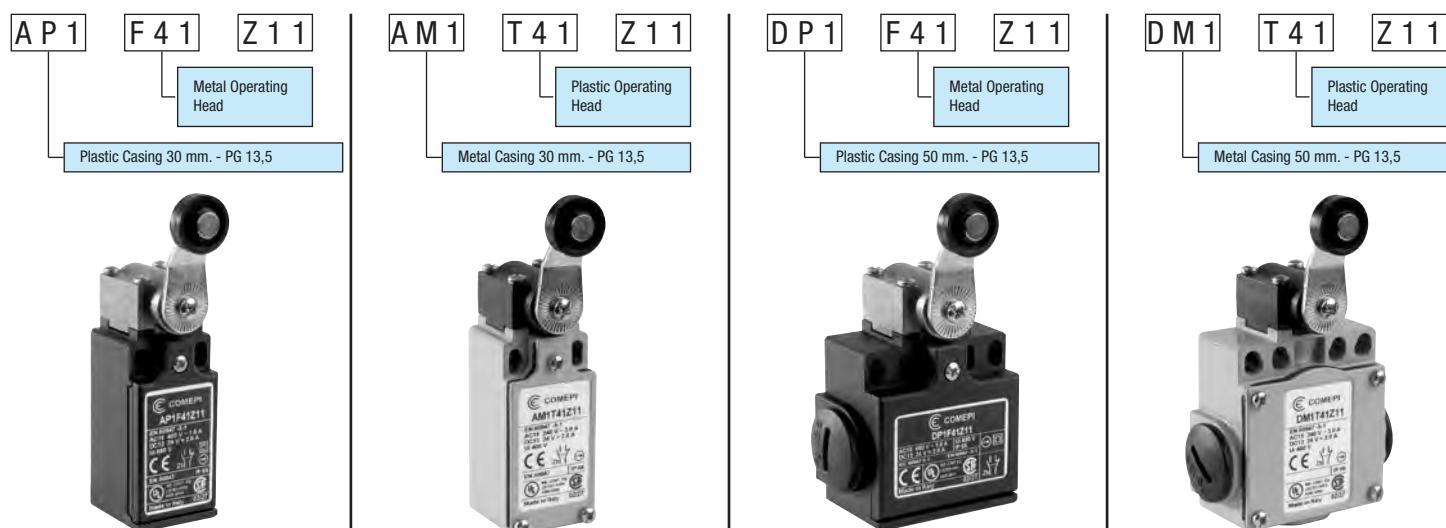

- plastic operating head on metal casing

- metal operating head on plastic casing

These "mixed" versions can be demanded as follows

### Examples:

For further information, please contact our technical department.

### Spare parts

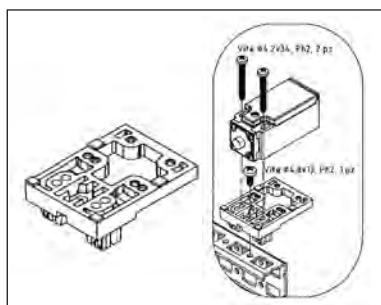

Spare components can be supplied upon request.

#### Spacers

This accessory, made of polymer glass-reinforced resin, allows the lever to operate with a different offset.

XX5D050SM	5 poles PVC cable - 5m with M12 straight connector
XX8D050SM	8 poles PVC cable - 5m with M12 straight connector

#### Cable glands - Blanking plugs - Thread adapters

The use of correct cable gland (or blanking plug in case of unused cable inlets) is recommended if the product is installed in an environmental place in which a protection degree against water or dust is needed. Comepi's cable glands and blanking plugs are realized to guarantee protection degree of IP 66. Thread adapters are available in order to reach the customers' request. The adapters must always be used in case a conduit connection directly on the limit switch is needed. Different adapters can be supplied upon request.

# DP\_T Limit Switches

Double Insulation  
Plastic Casing IP65 - 50 mm. width

## Electrical Connection

**DP1:** two cable inlets for PG 13,5 Cable Gland

**DP2:** two cable inlets for PG11 Cable Gland  
with one plastic adapter PG11 - 1/2" NPT

**DP3:** two cable inlets for PG11 Cable Gland

**DP4:** two cable inlets for M16 x 1,5 Cable Gland

**DP5:** two cable inlets for M20 x 1,5 Cable Gland

## Operating Head Type

**T55 - Adjustable lever  
with adjustable Ø 50  
rubber roller**

**T61 - Nylon actuator  
with stainless  
steel spring**

**T62 - Stainless steel  
spring actuator**

Conformity / (N.C. contact with positive opening operation)  
Max actuation speed [m/s]  
Min. force [N] or torque [Nm]: actuation / positive opening operation

# BP\_H Limit Switches

Double Insulation  
Plastic Casing IP65 - 40 mm. width

## Electrical Connection

**BP1:** one cable inlet for PG 13,5 Cable Gland

**BP2:** one cable inlet for 1/2" NPT Cable Gland

**BP5:** one cable inlet for M20 x 1,5 Cable Gland

## Operating Head Type

**H92 - Multidirectional nylon actuator with stainless steel spring**

**H93 - Stainless steel spring multidirectional actuator**

Conformity / (N.C. contact with positive opening operation)

## AP• series

## 30 mm. polymeric limit switches - IP 65 □ - EN 50047 - 1 cables entry

**Cable inlets:** Replace the symbol • with the number of the required thread

**AP1:** PG 13.5

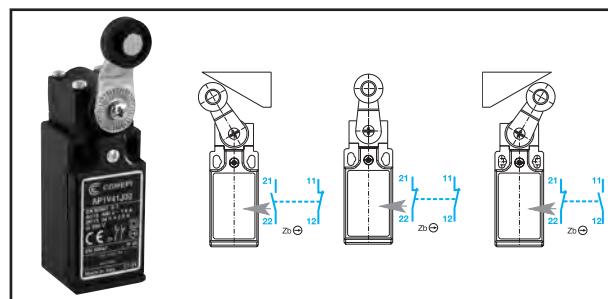

**AP2:** 1/2" NPT (with adapter)

**AP3:** PG 11

**AP4:** M 16 x 1,5

**AP5:** M 20 x 1,5

## AP•V41J02 series

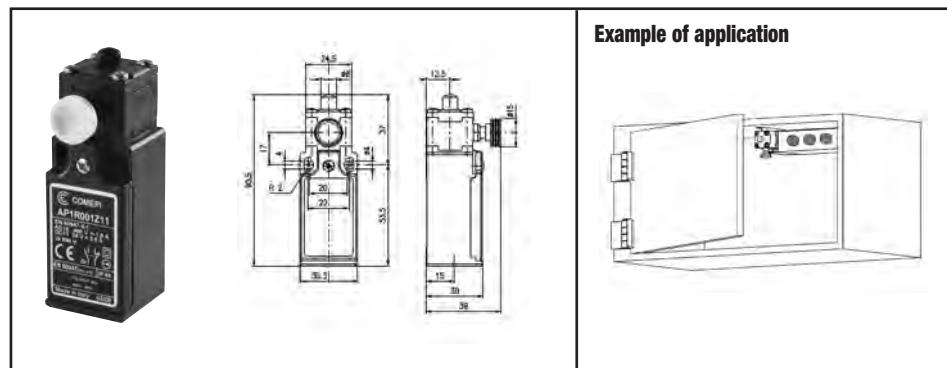

### Description

The Switch is settled with 2NC contacts in free position.

The actuation of the lever causes the opening of the contact related to the actuating direction, leaving unchanged the status of the second contact. Both contacts have positive opening operation according to IEC/EN 60947-5-1 standards.

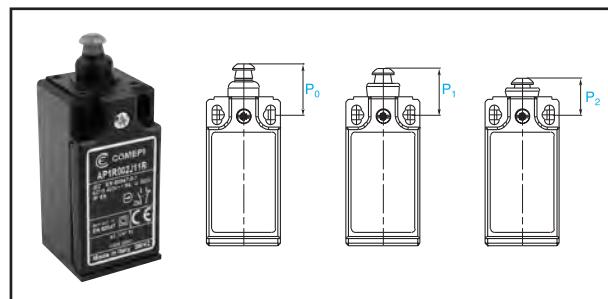

## AP•R001Z11 series

### Description

This particular limit switch has been developed in order to fulfill all the requests coming from applications in which there is the necessity to simulate the change over in contacts position without acting directly on the plunger of the switch. The use of this device is particularly useful in the realization of electrical boards in order to simulate the closing of the door simply by pushing the yellow button on the limit switch; the assigned staff will then be able to work on the internal circuit to make modifications, maintenance, etc... The conditions of normal operation are automatically restored once the door of the electric board is closed.

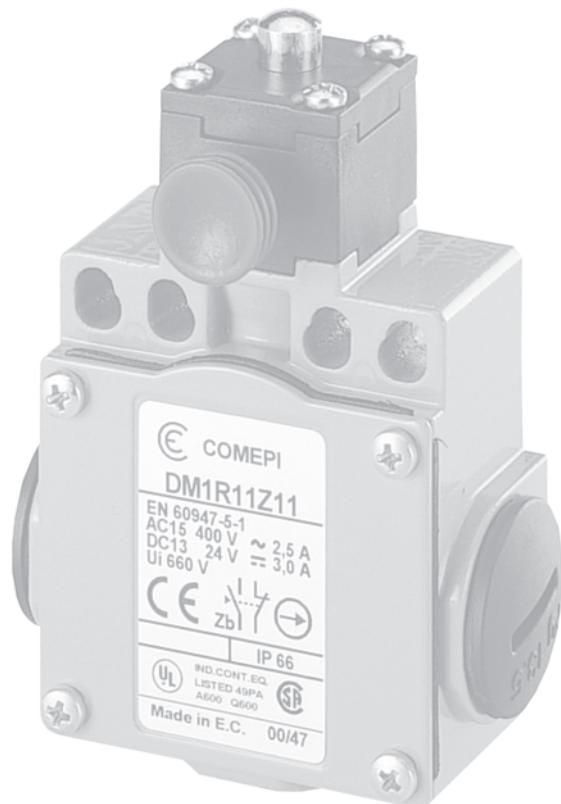

## AP•R002J11R series

### Description

The switch has been designed specifically for applications on over-speed devices; by actuating the plunger until the operating position P1, the electrical contacts switch and simultaneously the plunger reaches position P2 automatically. The device is restored by pulling the blue plunger until the free position P0. The switch can be supplied with 1NO+1NC contacts (AP•R002J11R) or with 2NC contacts (AP•R002J02R); all the NC contacts have positive opening operation..

# SAFETY LIMIT SWITCHES

### Application

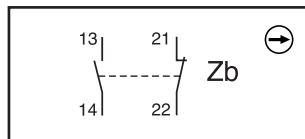

The Comepi limit switches are developed and manufactured according to the rules set out in IEC international publications and EN european standards.

#### Easy to use, electromechanical limit switches offer specific qualities:

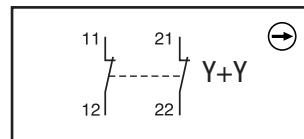

- Visible operation.
- Able to switch strong currents (10 A conventional thermal current).
- Precise operating points (consistency).
- Immune to electromagnetic disturbances.
- Electrically separated contacts.
- N.C. contacts with positive opening operation (⊖).

### Contact Blocks

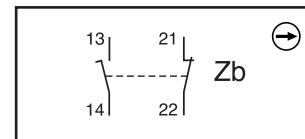

**Z11** Snap action  
1NO+1NC

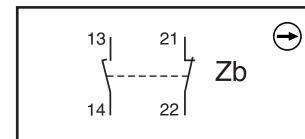

**Z02** Snap action  
2NC

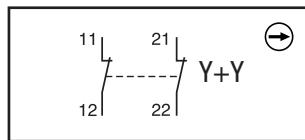

**X11** Slow action break before make 1NO+1NC

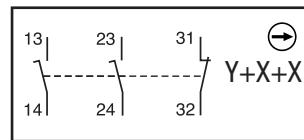

**Y11** Slow action make before break 1NO+1NC

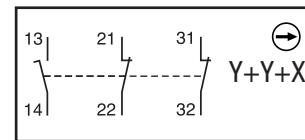

**W02** Simultaneous slow action  
2NC

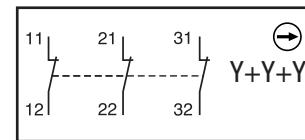

**X21/X21P** Slow action break before make 2NO+1NC

**X12/X12P** Slow action break before make 1NO+2NC

**W03/W03P** Simultaneous slow action 3NC

### Main Technical Data

	SP, SBP, SDP series	SM, SBM, SCM, SDM series
Standards	IEC 60947-5-1, EN 60947-5-1, UL 508, CSA C22-2 No 14	
Operating temperature range	-25°C... +70°C	
Protection against electrical shocks (acc. to IEC 60536)	Class II	Class I
Protection degree (acc. to IEC 60529)	IP65	IP 66
Rated insulation voltage (acc. to IEC 60947-1)	$U_i = 690V$ (SM, SDM series and contacts type Z02, X12P, X21P, W03P series: $U_i = 400V$ )	
Rated impulsive withstand voltage (acc. to IEC 60947-1)	$U_{imp} = 6kV$ (4kV for contacts type X12P, X21P, W03P)	
Short-circuit protection	Fuse 10A type gG (gl)	
Power category	A600 - Q600 (SM, SDM series and contacts type X12P, X21P, W03P: A300 - Q300)	
Rated operational current (acc. to IEC 60947-5-1)	AC-15: 24V - 10A; 400V - 4A DC-13: 24V - 6A; 250V - 0,4A	

### Electrical connection

Replace the symbol ⊖ with the number of the required thread

- 1: PG 13.5
- 2: 1/2" NPT (Through adapter on SP and SDP series)
- 3: PG 11 (Available on SP, SM, SDP and SDM series)
- 4: M16x1,5 (Available on SP, SM, SDP and SDM series)
- 5: M20x1,5

## FOOT SWITCHES

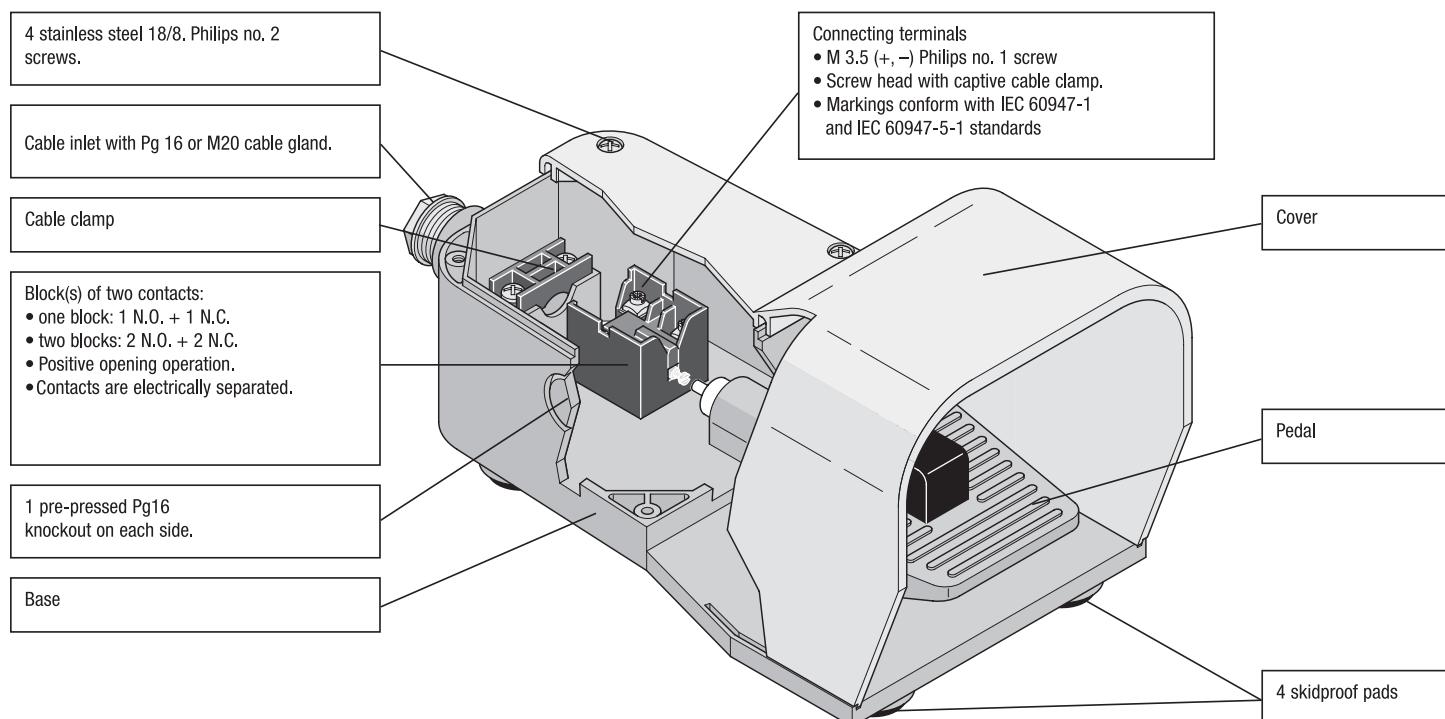

## Applications

Foot switch operated machines such as: shearing machines, spinning machines, spinning lathers, machine tools, wrapping machines, riveting presses, etc.  
 Foot switches come in five operation formats:

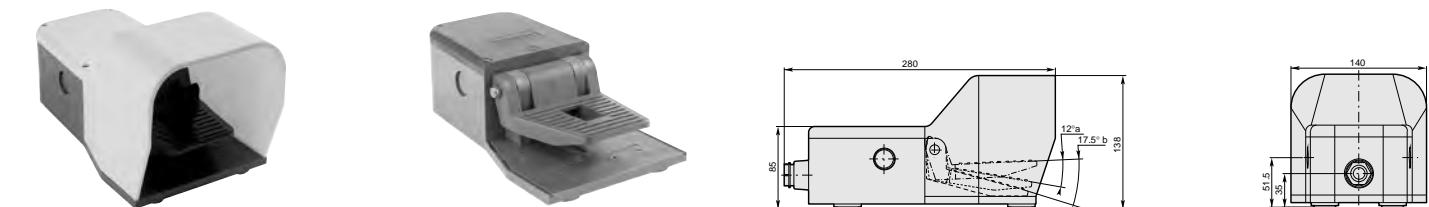

- **Free movement:** contact position follows pedal movement: actuated when the pedal is pushed down, released when pedal is in state of rest.
- **Foot switch locked in neutral position:** same operation as above, after unlocking the pedal with the end of the foot.
- **Foot switch latched in low position:** same operation as free movement, excepted that a state of rest is obtained only after having unlatched the pedal with the end of the foot.
- **Free movement with two-stage actuating force:** two different contact blocks are actuated with a different force on the lever.
- **Foot switch locked in neutral position with two-stage actuating force:** same operation as above, after unlocking the pedal with the end of the foot

## Description of the switch

- **Dimensions:** 280 x 140 x 138mm.
- **Materials:** Standard version (IMQ approved): Base, cover and pedal made of shock resistant ABS material.  
**Self-extinguishing / VO (IMQ, UL, CSA approved):** Base, cover and pedal made of Polycarbonate/ABS-VO.  
**Metal version / VO-M (IMQ, UL, CSA approved):** Cover made in die cast aluminium, base and pedal made of Polycarbonate/ABS-VO.
- **Colour choice:** Grey base; grey, yellow or red cover.
- **Variations:** Grey base, half-red cover. Especially used for emergency stop function.

## Dimensions (in mm)

#### Symbols

Example: P S 1 2 1 1 / VO

Structure: P [ ] [ ] [ ] [ ] / [ ]

**Type**  
S = Simple Foot Switch  
D = Double Foot Switch

**Electrical connection**  
1 = Pg 16 cable gland  
2 = M20 cable gland

**Devices**  
1 = Free movement of the lever  
2 = Movement of the lever dependant of the safety device notch  
3 = Device to maintain the lever in lowered down position  
4 = Free movement with two-stage actuating force  
5 = With safety device notch and two-stage actuating force

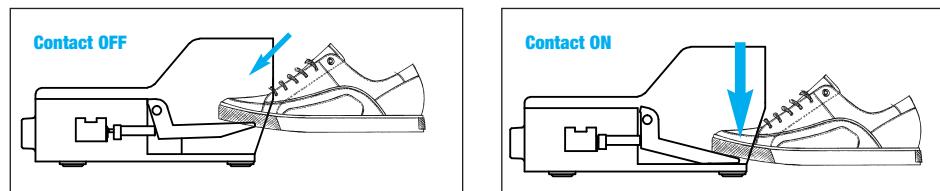

**Contact blocks**  
1 - One (NO+NC) snap action contact  
2 - One (NO+NC) slow action contact  
3 - Two (NO+NC) snap action contacts  
4 - Two (NO+NC) slow action contacts

**Cover material**  
- = Shock resistant ABS (standard)  
VO = UL approved self-extinguishing  
VO-M = UL approved with aluminium cover

**Cover colour** 1 = Yellow / 2 = Grey / 3 = Yellow + Grey (PD series)  
4 = Red / 5 = Half red cover / 7 = Half yellow cover / 8 = Half grey cover

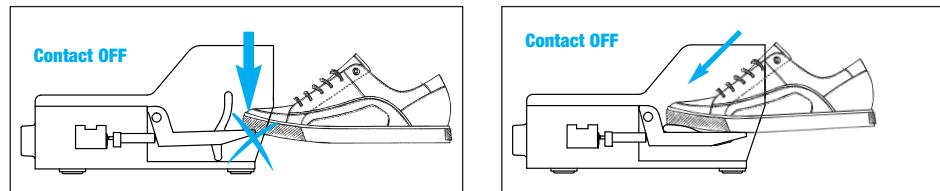

#### Devices

##### 1: Free movement of the lever

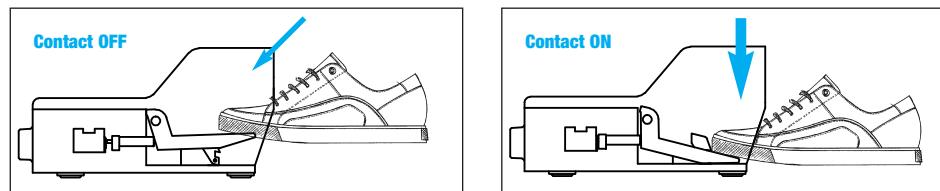

The lever can be actuated without any particular device.

##### 2: Movement of the lever dependent of the safety device notch

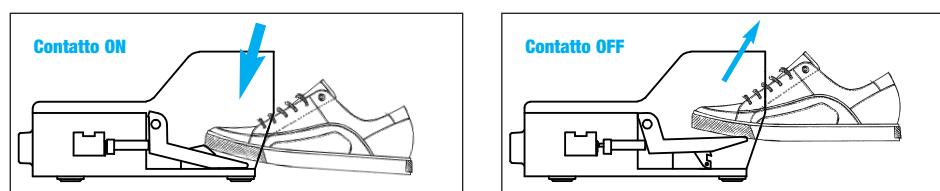

The pedal can be actuated only by lowering the safety lever fully inserting the foot, thus preventing any accidental actuation.

##### 3: Device to maintain the lever in lowered position

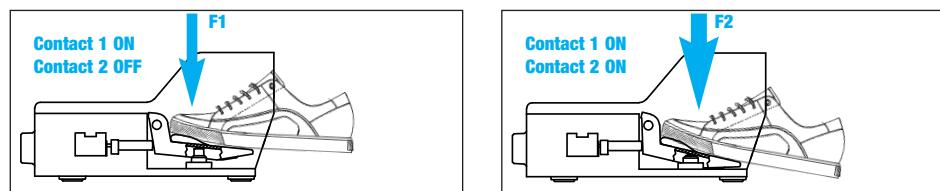

By pushing the lever the contact switches and the lever remains locked in lowered position.

Push the locking device in order to unlock the pedal actuator.  
Once you release the lever the contacts return to their initial position.

##### 4: Free movement with two-stage actuating force

By applying a light pressure F1 on the lever, the first contact block will be actuated while the second keeps in state.  
An higher pressure F2 on the lever will switch also the second contact block.

##### 5: With safety device notch and two-stage actuating force

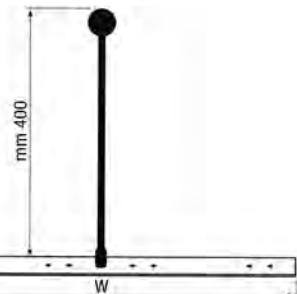

Same as above but the pedal can be actuated only by completely inserting the foot in the device.

#### Carrying Rod Kits

##### Example of application

##### Type A

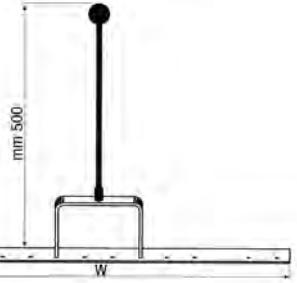

Order Code	Description	W (mm)	Type
<b>PD1000</b>	Max 2 Foot Switches*	350	A
<b>PD1001</b>	Max 3 Foot Switches*	520	B
<b>PD1002</b>	Max 4 Foot Switches*	700	A
<b>PD1003</b>	Max 5 Foot Switches*	850	B

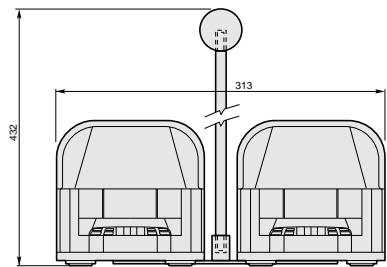

\* Foot Switches not included

Note: Each carrying rod kit includes necessary fixing screws and cable glands for the specified number of foot switches.

##### Type B

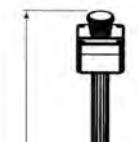

##### Example of double foot switch application

#### Metal Steel Frame

##### Example of application

Order Code	Description	W (mm)
<b>GR2025</b>	For 1 Foot Switch only*	230
<b>GR2026</b>	Max 2 Foot Switches*	350
<b>GR2027</b>	Max 3 Foot Switches*	530
<b>GR2028</b>	Max 4 Foot Switches*	700

\* Foot Switches not included

##### Attention!

**Push button and plastic box not included:**  
please consult our "Control Units Ø22" catalog.

Note: Each carrying rod kit includes necessary fixing screws and cable glands for the specified number of foot switches.

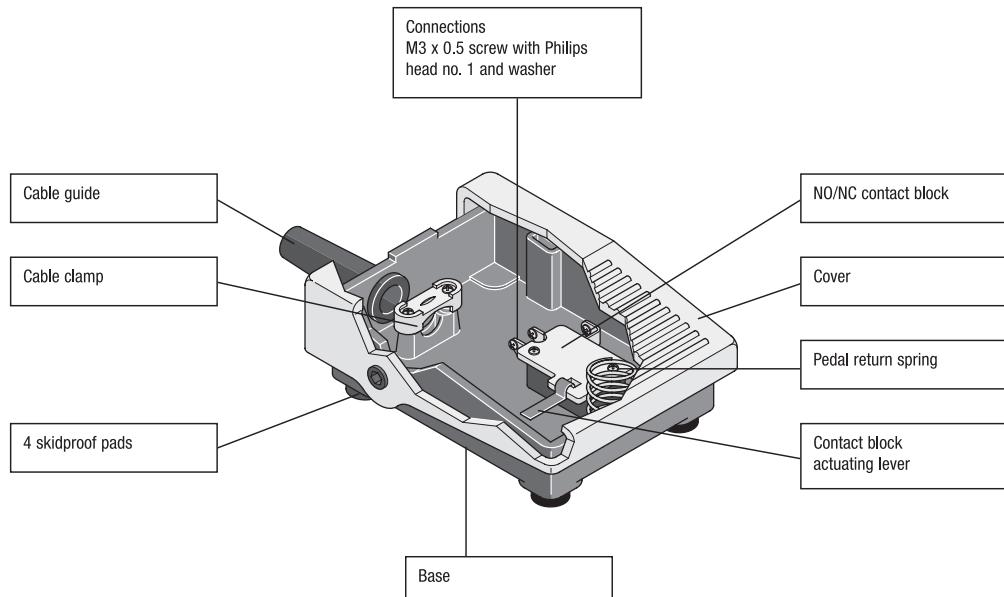

#### Applications

Comepi foot switches of the MP series are plastic foot switches in mini design that besides their robust form and technical versatility are specially convincing for their functionality and ergonomic design. They can be applied on foot switch operated machines such as: shearing machines, spinning lathers, machine tools, wrapping machines, riveting presses, etc.

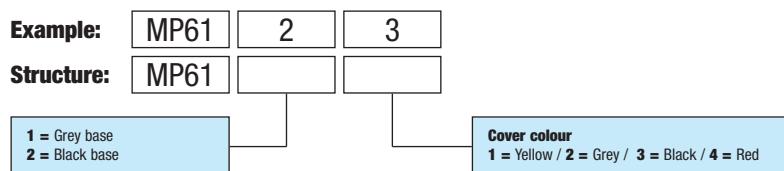

#### Description of MP6... Mini Foot Switches

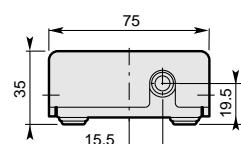

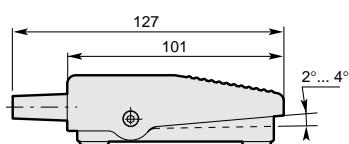

- Dimensions:** 100 x 75 x 34 mm.
- Materials:** cover and base made of self-extinguishing ABS.
- Colour choice:** black or grey base; black, grey, yellow or red cover.
